SPEAKER ONE-SHEET · 2026–27

Machines decide who gets seen, funded and trusted. She shows leaders how to govern them.

Frontier-markets investor, independent director and business-school educator working where deep technology meets institutional capital. Leesa builds and funds the systems she speaks about — and turns that pattern recognition into frameworks boards and investors can run on Monday morning.

SIGNATURE KEYNOTES

Algorithmic Roulette

Who gets seen, who gets funded, and who owns the future. The flagship keynote of the forthcoming book — how algorithmic systems shape decisions before they reach human decision-makers, and what it takes to stay fit to govern them.

Masters vs Robots

The future of work when automation reaches judgment itself. Classroom-tested with Global Executive MBA cohorts before it went to the international keynote stage.

Board Governance in the Age of Machine Judgment

Preserving challenge, accountability and human agency when decision support starts to become the decision.

& JOHNSON · IE BUSINESS SCHOOL · SINGAPORE MANAGEMENT UNIVERSITY

New book — *Algorithmic Roulette*

Who Gets Seen, Who Gets Funded, and Who Owns the Future. "Machines are reshaping institutional judgment. Most boards still govern as if judgment were exclusively human."
